Address: Tęczowa Street, Niemcz 86-032, Osielsko

Address: Tęczowa Street, Niemcz 86-032, Osielsko

County: Bydgoszcz, dz.nr.ew. 99/59, 99/60 with access to a municipal and public road dz.nr.ew 99/90

Infrastructure: water - from the water supply, sanitary sewage, rainwater drainage, electricity, central heating and hot water - air-water heat pump with hot water storage tank by DIMPLEX, gravity ventilation, telecommunications network, underfloor heating, additional electric radiators in bathrooms.

Additional installations: water and electrical installation for connecting garden watering, electrical installation for air conditioning in the living room and bedroom, additional three-phase installation in the garage, e.g. for charging an electric car, and on the terrace for connecting, for example, a Jacuzzi, distribution of a shower installation in the garden, LED external lighting of the house, installation for monitoring and alarm, RTV, Internet, installation for SMART READY (intelligent control), automatic control of the entrance and garage gate, intercom (possible remote control of the installation).

Energy-saving building

Elegant two-family houses, belonging to the collection of villas and residences is located in a quiet and forested part of the center of Niemcz. Two full floors and an optimally composed functional layout ensure maximum comfort. The façade finish is an effective combination of light plaster with steel-colored joinery.

A modern detail are glazed balustrades, which together with numerous glazing add a unique elegance. The building consists of two separate apartments of 162.14 m² plus an attic of 60 m² and each of them has a single-car garage (second outdoor position in a closed house), an adjacent plot to each of the apartments of 525 m² / 584 m². The apartments have independent main entrances, a garden separated by a metal fence with plantings. The entrance areas have been roofed with a balcony designed on the first floor. In a similar way, a large terrace on the garden side was sheltered.

Inside each apartment there is a spacious and full of natural light day zone, with two exits to the corner terrace. The living room with a fireplace, in combination with a dining room and direct access to the terrace, which is a place of relaxation due to the large spacious glazing with a view of the garden and direct access to a large terrace, on which the installation for the Jacuzzi connection is prepared, and in the living room and bedroom for air conditioning.

A large dining room with a spacious view of the garden and direct access to the terrace, combined with a kitchen and additionally a corner window, opening a view of the entrance area and the garden, is a bright and comfortable place. Optimally designed functional layout of the kitchen, has the possibility of installation spacious worktops and very practical high buildings, which effectively manages space with a large amount of storage space.

In the basement boiler room with a heat pump, the possibility of developing a laundry and a technical room is provided. In the corridor, where it is possible to install a spacious wardrobe, there is a bathroom with a shower, in the vestibule itself there is a place for building a large wardrobe.

On the first floor there are four adjustable rooms, among them a large bedroom with its own wardrobe and access to a spacious balcony from the garden side, which is also connected to the second bedroom. Near the stairs there is a large bathroom, where there is an exit to a large balcony from the front side of the building.

Triple-glazed windows on German PVC profiles, graphite color, internal window sills made of granite in light color, external window sills made of aluminum sheet coated in graphite color, external automatic anti-burglary blinds on all windows, external panel house fence, fence height up to 1.7 m, automatic controlled entrance and garage gate, wicket with intercom, garage entrance, terrace, terrace stairs, external entrance - hardened with an exclusive Magna terrace tile, external glass balustrades.

In the garden there are: few trees: coniferous and deciduous trees, grass, plantings.

For individual order: Outdoor pool, photovoltaics, Jacuzzi and utility room in the garden of 10 m², built-in underground rainwater container, turnkey finishing with the project.
